## Routine maintenance

- About Charging:**  
 Recommend to use the 5V 1A charger to prevent damage to the controller circuit, and avoid high-power or PD fast charging chargers due to different charging protocols.
- Dust Prevention:**  
 To prevent joystick drifting caused by dust, use a storage bag or other protective measures to minimize dust impact on the inside of the game controller.

- Firmware Update:**  
 Check for the latest firmware updates on the [HTTPS://ELITEMODDINGGEAR.COM/DOWNLOAD](https://elitemoddinggear.com/download). If updates are available, follow the instructions provided to update the controller's firmware.
- Ventilation Recommendation:**  
 Store the controller in a dry environment to safeguard electronic components from potential damage due to humidity.
- Protective Measures:**  
 To safeguard vulnerable parts like joystick and joypad, use protective cases or films to minimize scratches and collisions during daily use.
- Avoid Overuse:**  
 Prevent overuse to extend battery life. Turn off the equipment when not in use.
- Power Supply and Cable Inspection:**  
 Regularly inspect the power cord and plug for integrity. Charge the controller periodically, as prolonged battery depletion can lead to battery damage.
- Safety Performance Check:**  
 Regularly examine the mechanical function of the product to ensure the proper operation of the device and other hardware.

## Controller Q&A

- Q: How long can the controller be used?**  
 A: Under normal conditions, our controller can last for approximately 10 hours. Usage of features like vibration and Auto-fire affects battery consumption.
- Q: How to Charge the Controller?**  
 A: **Charging with Charging Cable:** Plug the provided charging cable into the controller's type-C port to charge it.
- Q: What is the operating current and Voltage?**  
 A: Working Voltage:4.5V-5.5V; Working Current:4.5V-5.5V;
